#### Main Screen

Press Icon always goes to Main Screen Press goes to New Drink Screen Drinkbot Refreshes list: Cleans list and downloads from database Image Populated from Database: Cosmopolitan Under DrinkTable -> URL for each drink. Image in URL is Always 2000x2000px scaled to fit screen. See: Scroll Example Screwdriver **Whiskey Sour** Daiquiri Press goes to Settings Screen

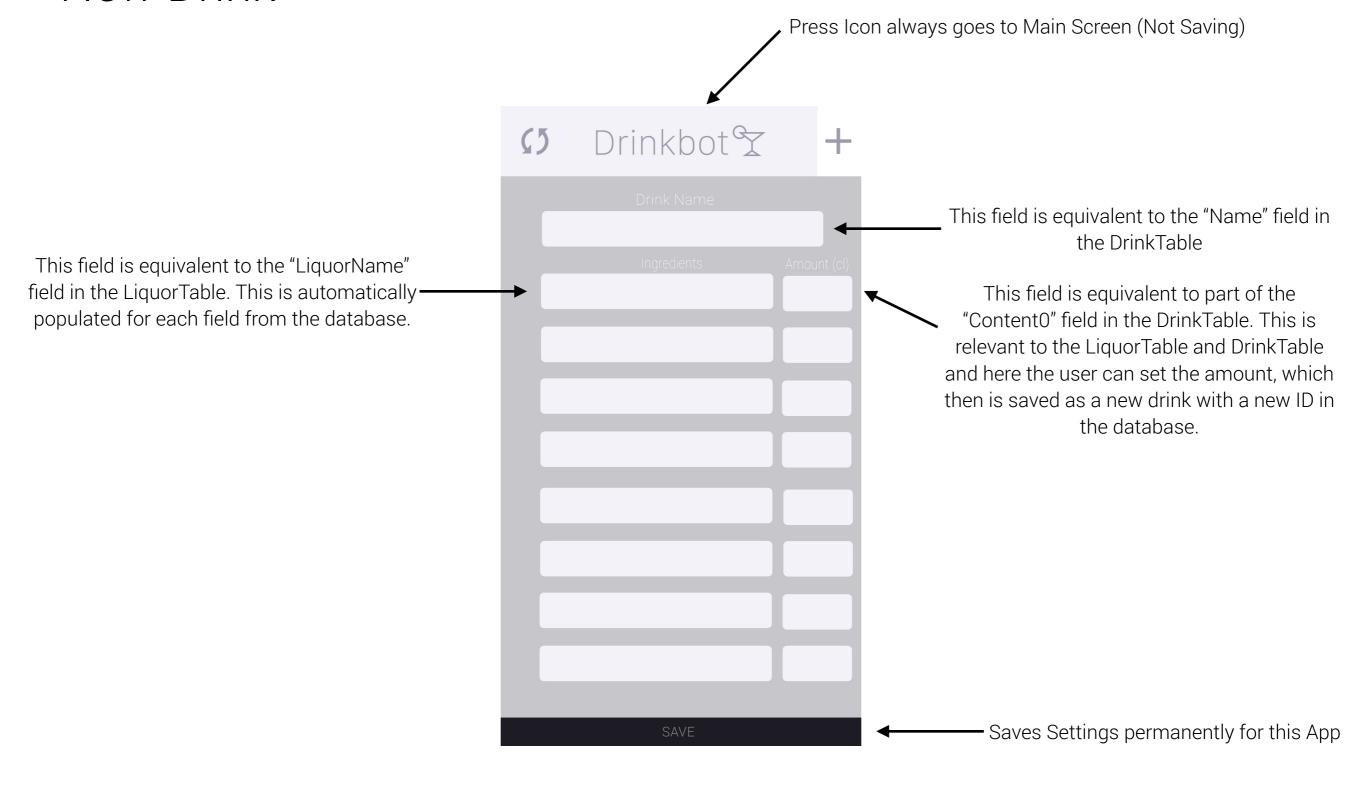

# Main Screen Scroll Example

## Settings

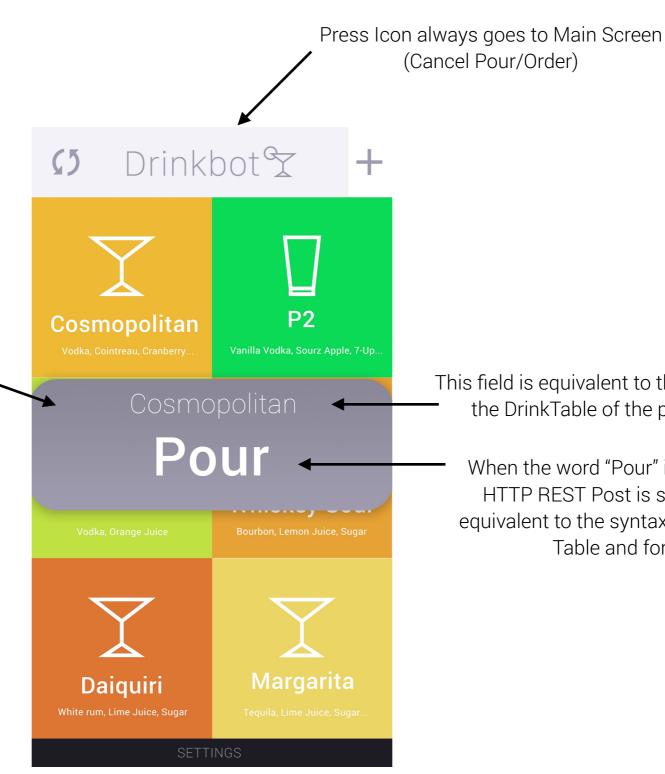

## New Drink

## Order

This pops up over the main meny when a drink is pressed. This goes away if the user presses outside of the "bubble"

This field is equivalent to the DrinkName from the DrinkTable of the picture pressed.

When the word "Pour" is pressed a single HTTP REST Post is sent to the Server equivalent to the syntax for the Drink in the Table and for the API.
